

## Bureau of Land Management, Interior

## § 3252.12

(e) After our review, we will notify you whether we approved or denied your permit, as well as any conditions we require for conducting operations.

### **§ 3251.14 Once I have a permit, how can I change my exploration operations?**

Send BLM a complete and signed sundry notice, form 3260-3, which fully describes the requested changes. Do not proceed with the change until you receive written approval from BLM.

### **§ 3251.15 Do I need a bond for conducting exploration operations?**

Yes, do not start any exploration operations on BLM-managed lands until we approve your bond. You may meet the requirement for an exploration bond in two ways.

(a) If you have an existing nationwide or statewide oil and gas exploration bond, provide a rider to include geothermal resources exploration operations, in an amount we have specified.

(b) If you must file a new bond, the minimum amounts are:

- (1) \$5,000 for a single operation;
- (2) \$25,000 for all of your operations within a state;
- (3) \$50,000 for all of your operations nationwide.

(c) See 43 CFR subparts 3214 and 3215 for additional details on bonding procedures.

### **§ 3251.16 When will BLM release my bond?**

We will release your bond after you request it and we determine that you have:

- (a) Plugged and abandoned all wells;
- (b) Reclaimed the land; and
- (c) Complied with the requirements of 43 CFR 3200.4.

## **Subpart 3252—Conducting Exploration Operations**

### **§ 3252.10 What operational standards apply to my exploration operations?**

You must:

- (a) Keep exploration operations under control at all times;
- (b) Conduct training during your operation which ensures your personnel are capable of performing emergency procedures quickly and effectively;

(c) Use properly maintained equipment; and

(d) Use operational practices which allow for quick and effective emergency response.

### **§ 3252.11 What environmental requirements must I meet when conducting exploration operations?**

(a) You must conduct your exploration operations to:

(1) Protect the quality of surface and subsurface waters, air, and other natural resources, including wildlife, soil, vegetation, and natural history;

(2) Protect the quality of cultural, scenic and recreational resources;

(3) Accommodate other land uses, as we deem necessary; and

(4) Protect people and wildlife from unacceptable noise levels.

(b) You must remove or, with our permission, properly store all equipment and materials not in use.

(c) You must provide and use pits, tanks and sumps of adequate capacity. They must be designed to retain all materials and fluids resulting from drilling temperature gradient wells or other operations, unless we have specified otherwise in writing. When no longer needed, you must properly abandon pits and sumps in accordance with your permit.

(d) We may require you to submit a contingency plan describing procedures to protect public health, safety, property and the environment.

### **§ 3252.12 How deep may I drill a temperature gradient well?**

You may drill a temperature gradient well to any depth we approve in your exploration permit or sundry notice. In all cases, you may not flow test the well or perform injection tests of the well unless you follow the procedures for geothermal drilling operations in 43 CFR subparts 3260 through 3267. BLM may modify your permitted depth at any time before or during drilling, if we determine the bottom hole temperature or other information indicates that drilling to the original permitted depth could directly encounter the geothermal resource or create risks to public health, safety, property, the environment or other resources.
